DETAILED ACTION

Claim Objections

1. Claim 21 and 39 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 20, 22-38 and 40-48 are rejected under 35 U.S.C. 102 (b) as being anticipated by Monette et al. PCT WO 01/82009.

Regarding claims 20, 23, 28-33, 37-38, 41, 44-48 Monette et al. discloses an operating method for a machine tool for machining a workpiece, comprising the steps of: processing a step sequence; wirelessly reading out at least one part program from a workpiece data carrier assigned to the workpiece during the processing of said step sequence (Figure 8); and controlling the machine tool so that the machine tool machines the workpiece in accordance with said part program (Page 4 L13-16).

Art Unit: 2125

Regarding claims 22, 24-26, 34, 40 and 42, Monette et al. discloses wherein a plurality of identical workpieces to be machined identically are assigned to said workpiece data carrier and said part program is wirelessly read out from said workpiece data carrier only once for said plurality of identical workpieces (Page 15 and 16).

Regarding claims 27 and 43, Monette et al. discloses wherein said description of the workpiece includes information about the workpiece material (Abstract and Page 5 L24-28).

Regarding claims 35 and 36, Monette et al. discloses wherein said component data includes status data, and further comprising the step of transmitting updated status data to said component data carrier after the workpiece has been machined (Page 7 L6, Trace Data).

Citation of Pertinent Prior Art

4. Applicant is respectfully requested to fully consider all the references, in entirely, that appear on the attached list (Form PTO-892). These references disclose subject matter similar to that of applicant's disclosure and may be relied on in a future response to Applicant's remarks or amendments.

Application/Control Number: 10/598,902 Page 4

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Ortiz-Rodriguez whose telephone number is 571-272-3766.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard can be reached on 571-272-3749. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
